## A Tyrant Ends

Well the time is here and unfortunately, the Grey Knights arrived first. They have made a plan to extract former Inquisitor Coles from the administration building.

The plans have been made and ready to launch. The final order came from the Governor for if the 10 man unit of Grey Knights fail then the Wolves are going in. Wolf Lord Blackmane is on site and his Wolf Guard are

eager for some fun it seems.

Last weeks attack was a massacre. The automated defence system slaughter the PDF and the Krieg were stopped by the unknown defense grenades placed on all know entrances including the Governors secret way out. The plan is to strike sometime tomorrow.

“You still have time to surrender Coles. Your

men don't need to die like this. Save yourself and the lives of your men. Or not”

Glory to the Emperor, and justice has come

## Open WAR on our planet. “Continues”

As the war continues on, we take a look at what has happened. From what we can gather we have lost 10 news reporters. Over \$100,000 worth of equipment but our teams on the field got a lot of experience.

On the front the 6<sup>th</sup> company wolves faced off against Ork Warboss Nevada and his boyz. The Nids took on the space marines, Tau faced off against the 4<sup>th</sup> company space wolves, Dark Eldar took the fight but lost it to the Imperial forces.

The battles lasted for days and many lives were lost. With all this going on and the Main City under siege how is it that our little planet came to such war. They are all after the relics that have landed on our planet. Curse that asteroid that hit the space hulk. All this trouble for relics of the dark ages. This war will end soon and good to it. All that remains afterwards will be the final choice of what will happen to us.

I hope we are just left alone.

As the war continues. We will one day see the end of it.

Glory to the Emperor and may he protect the innocent.

## Space Wolves 6<sup>th</sup> VS Ork Warboss Nevada

The Space Wolves 6<sup>th</sup> and the Ork Warboss Nevada clashed with fist of fury on the battle field once again.

The fight had lasted over 5 days and by day 3 it was nothing more then a brawl. The shooting had stopped and both sides just went for a blood bath fist, axes, and head butts.

The Wolves took the victory over the Orks and celebrated in kind. The

day was there and the ale tasted so sweet. When the wolf lord was examining the body of the Warboss he was hit and a secondary brawl started. The Warboss got away and the Wolf lord made a smirk. Another fight for them.

The Orks once again getting away from losing a fight, but never giving up. Determination they have and victory they will one

day achieve before this is all over

## Tau 'Swordwind Cadre' VE Space Wolves 4th

Tau and Space Wolves 4<sup>th</sup> company clashed on the field.

The Tau ripped right through the Wolves long range abilities taking out the 6 man Long fangs, a land raider and a dreadnaught. Eliminating, all long range capabilities. The wolves returned the favor by dropping in grey hunters and Wolf Guard units destroying the hammerhead but the return fire from the Tau

destroyed the right flank and much of the left.

The fire warriors and the ethereal held off the grey hunters, which gave the drones time to bring down the Wolf Lord with small arms fire and the riptide eliminated the grey hunters in the end.

The Tau took the a major victory on the Wolves. They managed to take the field. The Wolves collected their Wolf Lord and vowed revenge

against the Tau for this disgrace.

## Alpha Legion

Alpha Legion, once again spotted, all over the planet. They are up to something but what. The time will come to show what they are planning until then, watch out around you cause you never know what and

where they are. They are planning something big. They have been since day one.

## Space Marines Vs Nids

The Space Marines looking for a fight and found one with the Nids. The Nids came from nowhere and the Space marines took up arms right away.

The Nids brought the fight to them starting with more gaunts then I could count from where I was positioned. They just kept on coming. The Space marines did all they could to stop the flow of Nids but were slowly brought down over time. The Monstrous creatures took the large war machines down while the Flyers did what they

could to support. In the end the Nids took the victory collected everything they could and make more of them selves. The Space marines commander was taken by the apothecary to heal up. In the end the Nids took the field and celebrated in kind by moving on to the next battle. This will not end well but for now they are on the move.

## Iron Knights VS Imperial Guard

The Iron Knights faced off against the mighty that is the Imperial Guard.

The Iron Knights using their drop pods landed and deployed, while centurions with their commander in a land raider and a land speeder storm filled with scouts launched their attacks to land blows on the imperial guard tanks. 2 tanks were destroyed while a third was damaged.

The Imperial Guard launched a counter attack that failed to push back

the Iron Knights.

This battle lasted for days with the Iron Knights pushing forward and the Imperial Guard doing all they could to keep them back.

By the end the Guard lost and surrendered to the Iron Knights.

The Iron Knights with a victory in hand took what was now there's while the Guard quickly abandoned the area to regroup and possibly counter charge the Iron Knights.
